

NIT and Leuphana Professional School cooperate

Hamburg, 09 May 2018: The NIT Northern Institute of Technology Management and the Professional School of Leuphana University Lüneburg have agreed on a future cooperation with a Memorandum of Understanding. The two partners want to use their scientific expertise to develop joint continuing education programs. In addition, existing courses of study are to be exchanged. Another goal of the cooperation is to jointly open up new scientific topics and share experiences.

The NIT trains students and executives to assume management tasks responsibly. The Master's program in "Technology Management" combines technological and entrepreneurial knowledge and also teaches innovation methods such as design thinking. The Leuphana University of Lüneburg offers full-time degree programs as well as in-service training programs within the framework of its professional school to further develop executives, for example in the areas of sustainability, law, management, health and social affairs.

Verena Fritzsche, CEO of NIT, welcomes the cooperation: "We want to use synergies with Leuphana University Lüneburg and make our offer even more attractive in order to make training participants fit for the constantly new challenges of the professional world".

NIT Northern Institute of Technology Management

Knowing technology trends, entrepreneurially thinking, mastering digitization: At the NIT Northern Institute of Technology Management, talents from all over the world learn to take on management tasks responsibly. Together with the Technical University of Hamburg, the private institute of higher education offers a double Master's program in English: Engineering (MSc) and Technology Management (MBA or MA). In addition, the NIT develops tailor-made further training for industrial companies. With the Digital Think Tank, founded in 2016, NIT bundles its expertise in the areas of digitization and new leadership and provides relevant impulses for public debates. In workshops and lectures, entrepreneurs, managers, and teams learn new methods such as design thinking, what makes software developers tick and which digital trends are really important.

Leuphana Universität Lüneburg

Leuphana bundles its activities in the Professional School for part-time studies and further education. Since 2009, in-service bachelor's, master's and certificate courses, as well as advanced training such as seminars or webinars, have been offered. The offers come from the clusters Management & Entrepreneurship, Governance, Sustainability & Law as well as Education, Health & Social Affairs. The demand for the broadly diversified offers of the Professional School has grown more and more in recent years. It has developed into one of the most important academic continuing education providers in northern Germany and one of the largest continuing education institutions at German universities. Over 1,100 students are currently enrolled at the Professional School.
