

NIT Northern Institute of Technology Management

At the NIT under the motto 'BE THE CHANGE', talents from all over the world learn to take on management tasks responsibly. With a focus on digitization, global management and entrepreneurship, the NIT qualifies students and executives to shape the digital future. International high potentials, renowned scientists, and successful entrepreneurs come together in agile and networked learning spaces to create a special, intercultural learning environment. With expertise from research and industry, the NIT covers everything from study programs and lifelong learning workshops to process support for companies.

Master's Program in Technology Management

At the NIT, outstanding students in the Technology Management Master's program learn how to deal with the challenges of the digital world and actively shape the future. The future world of work demands dealing with complexity and constant change. Through real projects, students acquire an extensive technical understanding and solid management knowledge. They are accompanied individually by professors and practitioners in small international and interdisciplinary groups.

The Master's program can be completed as a master degree or as a double master degree (degree: MA or MBA) in combination with a Master's program in engineering sciences at the Technical University of Hamburg (TUHH). Professionals have the opportunity to study while working. The offer is flexible and modular and can thus be adapted to the individual needs of the students. A module consists of learning paths lasting several weeks in combination with virtual learning and face-to-face events.

Lifelong Learning for the Digital Age

With the NIT Toolbox, the private educational institute offers practice-oriented workshops and compact seminars on a scientific level for entrepreneurs, managers, and teams who want to promote digital change. Under the guidance of renowned lecturers from science and industry, the participants expand their competencies in the areas of new technologies, innovative methods, digital competencies as well as people management and culture. In addition, the NIT develops customized training programs for companies, especially with a global focus.

Process Support for the Digital Transformation

Furthermore, the NIT supports companies in the process of digital transformation. With regular events, such as the Hamburg Economic Dialog, the NIT sheds light on current and future developments. Thanks to the interdisciplinary network, a company's need for change is identified, analyzed and tackled. The aim is to enable employees to drive innovation and use new technologies to secure the future of the company.

About The NIT

The NIT is a private institute of higher education and was founded in 1998 by 40 professors of the Technical University of Hamburg (TUHH) as a non-profit limited company. It is financially supported by various foundations and companies, among others. The NIT is located on the campus of the TUHH in the south of Hamburg.
